APPLICATION INFORMATION

TO: ALL AXLE DISTRIBUTORS  
SUBJECT: NEW AXLE GENERAL INFORMATION GUIDE

Enclosed are your long awaited Axle General Information Guides. There have been a few minor changes in the format. We have included the Model 27 Ring and Pinion Kits for reference purposes, (These kits are no longer available,) and we have included a special section on the Model 61 Axle to help with some of the confusion on it.

Also you will find the Ring and Pinion Numerical Listing is in order by Ring Gear since this is the most important number. We have also listed the Front Axle Shafts numerically by complete assembly. The Rear Axles are listed by Length. We have included an extensive where used listing. This listing will also be important for use with the new Application Catalogs when they are finished.

Please note, there are a few corrections listed on the correction sheet with your New Axle General Information Guide. Please make a note of these before using your new XGI.

Advanced copies are enclosed and your bulk mailings will follow.
